

## **CELEBRATING EARTH WEEK:**

### **“Restore Our Earth”**

**Grade :I-III**

**Activity: Germination of Seeds**

***‘To plant a garden is to believe in tomorrow.’***

Little children are very curious about life and growth of living things. The Germination of seeds activity was done with the aim to demonstrate how plants develop from seeds.

The process of Germination was explained to the children along with practical experiment. Children were introduced to the topic Parts of Plants and module for the same were shown followed by scavenger hunt wherein children were given the riddles.

The session ended with the activity Germination of seeds that includes all the scavenger hunt material.

## **GRADE-II**

### **ACTIVITY: Poster Making**

***'Save the earth, save a life!'***

Poster Making and Slogan Writing activity related to the topic Earth Day was taken up with the students during the sessions. The students were also made aware how to restore Mother Earth and measures taken for the same. Ppt and video link also shared with the students for the explanation and better understanding. Students were able to list the ways of restoring our mother earth and create healthy planet. They also made beautiful and attractive posters related to the topic.

## Grade :III-V

### ACTIVITY: A PROMISE TO MOTHER EARTH 😊

To sensitise the students about the challenges faced by Mother Earth, an interactive session was organised for the students where they were made vigilant about the disastrous consequences yielded by the negligent and selfish activities of human beings through power point presentation by teachers.

In order to spread the message to conserve earth, the students were shown powerful quotes and slogans suggesting various ways to conserve tree, nature, water, recycle etc.

The students were also engaged in an exciting activity wherein, they drew a picture of Mother Earth and wrote a thoughtful promise that they made to sustain the beauty of our planet.
